

## Our Model

---

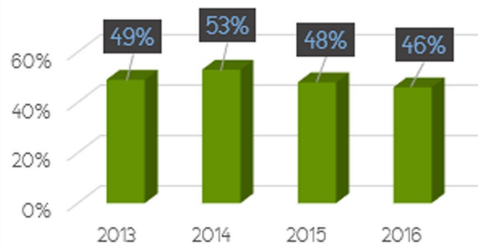

At Eyonix Systems we are dedicated to simplifying technology. Our services are a great value because they are flexible and provide on-demand scalability.

- We offer responsive technology services for people and businesses saving them time and money.
- We build our technology services to help people with any level of experience save time.

## Our Carbon Footprint

To lower the environmental impact while still providing stable cloud services, a solar photovoltaic solution was implemented in September 2012 to offset energy

Power Supplied by Renewable Sources

A list of our services include:

- Network Integration
- Drive Destruction
- Online Backup
- Security Audits

## Cloud Services

---

Online Backup  
Business User Plans

*Keeping an eye on IT essentials.®*

## Important Features

Eyonic Systems professional version service provides our customers with a cloud based, disaster preparedness data backup service. Our goal is to provide a service that is easy to set up and use and runs automatically as scheduled to prevent data loss while freeing up staff time and saving money.

Some of our key features are:

- \* **Scalability.** Purchase the plan size you need when you need it as plan sizes can quickly be adjusted, unlike localized physical solutions.
- \* **Supports Large Files & Databases.** Large files are easily backed up. Enterprise business users can also backup in-use databases automatically. Exchange database transaction logs are cleared after each successful backup runs.
- \* **Efficient Storage and Bandwidth Usage.** Files are checked before being uploaded to your account. Only new and changed files are uploaded greatly reducing the overall bandwidth usage while backing up files.

## Features Continued

Additional features of the professional version are:

- \* **No File Size or Data Transfer Limits.**
- \* **No Bandwidth Throttling, Ever.**
- \*  **Security.** Data is encrypted using 256-bit encryption.
- \* **Automatic Jobs & Email Notifications.** Backup jobs run automatically as scheduled and job notifications are emailed upon job completion.
- \* **Data Shipment.** Overnight shipment of data in the event of a disaster is available to enterprise business users at no cost. 
- \* **Seed Backups.** Used to complete initial backups faster and reduce the load placed on the customer's network.
- \* **Mobile Users.** Backup jobs run for staff on the go.
- \* **Unlimited Devices.** No limit to the number of devices than can connect to a single enterprise account; small business accounts can connect up to 20 devices.
- \* **File Versioning.** All versions of a file within the data retention period are preserved. 
- \* **Multiple Jobs.** Jobs can run on different devices in parallel within a single account.
- \* **Group Jobs.** Group and global jobs reduce setup time and ensure jobs run identically on multiple devices.
- \* **Software Updates.** Software is updated automatically so features are always up to date.
- \* **Availability.** Access to verify job logs, download or restore data, change data retention, set or modify existing jobs and more is available 24/7.

## Customer Quotes

*"The product works great, I get my job completion emails every day so I never worry about my backups. Additionally, the pricing is much more reasonable than many of the other online backup solutions I researched."*

*"This cloud-based backup service is the best! The ability to backup open databases like SQL and Exchange was imperative, and this system works. Eyonic uses incremental backups but I was worried about the time needed for the initial online backup. My concerns were alleviated when I found out they would overnight me a drive--the same was true if I needed disaster recovery. During backups they don't throttle bandwidth which was also important. Managing backups on all the computers I'm responsible for is a breeze, as I can create groups and set up a group backup job--and if I add a new client computer to the group I don't have to do anything else as the group job will backup the new client. Plus I can install and backup as many clients as I want--3 or 300--without any charge for additional clients, only storage space! The one time I needed to contact customer support I talked to a person who was knowledgeable, polite, and professional who resolved my issue quickly. I truly recommend this backup solution. "*

Eyonic Systems provides discounts to non-profit organizations as well as educational institutions, both public and private. For more information on these discounts contact us at (855) 439-6642.
